

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2023-May-24

**Agenda:**

- Approval of [minutes](#) from May 17th meeting.
- Review of [action items](#) from previous meetings.
- Review of [GitHub issues flagged for PMC agenda](#).
- JFrog status and improving packages.adoptium.net redundancy
- AoB

**Action items:**

| Date       | Description   | Status      |
|------------|---|-------------|
| 2023-04-26 | ACTION: sxa to confirm with the PMC channel that use of the historical co-lo can be ceased, and how the kit will be decommissioned. | In progress |

**Attendees:**

- ☒ George Adams
- ☐ Stewart Addison
- ☐ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☐ Shelley Lambert

- ☐ Andrew Leonard
- ☒ San Hong Li
- ☒ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

## Meeting called to order at 14:05 BST

### Minutes:

- Approval of [minutes](#) from May 17th meeting.
  - Minutes of the meeting were approved.
  - Noted that the attendance list may not be accurate for that meeting, as there may have been members present but not listed as such.
- Review of [action items](#) from previous meetings.
  - No updates on actions.
  - Should raise decision about the Nine colo decommissioning with #infrastructure channel so all are aware.
- Review of [GitHub issues flagged for PMC agenda](#).
  - None.
- JFrog status and improving packages.adoptium.net redundancy
  - Scott has uploaded all packages necessary.
  - The JFrog support ticket implies there is an intermittent block, of unknown cause. Possibly due to the rate of uploading multiple packages at Temurin release time? JFrog investigating the logs.
  - Would be desirable to have multiple sites for mirroring the repository for redundancy.
  - We wish for users to be able to get builds from any location provided it is a trusted and secure site - not all downloads need to be from Adoptium's sites.
  - Discussion of where the primary/definitive upload site would be, if it were JFrog that would not solve the current problem. Would consider an alternate primary (such as GitHub) with mirrors capable of handling the volume for user distribution.
- AoB
  - George reminded the PMC that Windows 32-bit has been deprecated in OpenJDK as of JDK21, and may be removed from future code streams.
  - This aligns with Adoptium strategy on this platform. We have not seen user demand for this platform.
