Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2023-June-14

Agenda:
- Approval of minutes from June 7th meeting.
- Review of action items from previous meetings.
- Review of GitHub issues flagged for PMC agenda.
- JFrog status
- Early access build availability
- AoB

Action items:

Date	Description	Status
2023-06-07	ACTION: sxa and George to enumerate equipment kept at the Nine co-lo, circulate the list, and come up with a plan to decommission.	In progress
2023-06-07	ACTION: gdams to obtain JFrog bandwidth/storage use to drive additional distribution site options.	Open

Attendees:
- ☑ George Adams
- ☐ Stewart Addison
- ☐ Carmen Delgardo (guest)
- ☑ Tim Ellison

- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☐ Andrew Leonard
- ☑ San Hong Li
- ☑ John Oliver
- ☐ Martijn Verburg
- ☑ Lan Xia

Meeting called to order at 14:04 BST

Minutes:
- Approval of minutes from June 7th meeting.
  - Minutes of the meeting were approved.
- Review of action items from previous meetings.
  - Progress on items in the Nine co-lo. Plan to give notice to Nine to shut down the service.
  - Continued discussions around what to do with the equipment retrieved.
- Review of GitHub issues flagged for PMC agenda.
  - Do You plan to release a deb Temurin OpenJDK 17 for Ubuntu 23.04? (https://github.com/adoptium/adoptium-support/issues/813)
    - i. Would require adding this supported version in the Deb metadata for the same binary.
    - ii. Noted that we don't have a clear policy on the provision of packages for specific distro versions. Likely include idea of "supported" distros.
    - iii. Consider distro-less packages referenced from a wider variety of repository entries, securing paths currently being used through JFrog.
    - iv. PMC decided to approve this addition.
- JFrog status
  - Failed multiple attempts to login by Adoptium infra members may have contributed to problems uploading packages.
  - Things are now back to business as usual. Not expecting further issues, but will monitor closely.
- Early access build availability
  - The Adoptium API currently uses 'EA' as an indication of nightly builds.
  - Can move the JDK21 EA builds to nightly status since wish to promote the tagged EA source code (expected weekly).
    - i. Would also free up resources consumed for nightlies at the moment on next version and LTS code streams.
    - ii. We will emphasize that the API access to EAs relates to early access tagged builds, not necessarily nightlies, i.e. not change the API but note the impact via documentation.
- AoB
  - ACTION: Martijn to create a statement of criteria for adding distributions in additional Linux packages.

- PMC should consider what would happen if we need to have alternate options for binary distributions.

Meeting closed at 14:31 BST
